**ASX Announcement**

**ASX Code: COY**

**4 July 2011**

**AMENDMENT TO PRESENTATION TO SHAREHOLDERS & INVESTORS**

An amendment has been made to page 14 of the attached presentation released to ASX on 30 June 2011 to change the footnote in the diagram from an Inferred Resource outline of 197Mt at 0.47% Cu. Eq. to 200Mt at 0.36% copper, 61ppm molybdenum, 0.06g/t gold and 2g/t silver.

A handwritten signature in black ink, appearing to read "P. Swiridiuk", is positioned above the printed name and title.

Peter Swiridiuk  
**MANAGING DIRECTOR**

For further information please contact Peter Swiridiuk on (07) 5592 1001 or visit [www.coppermoly.com.au](http://www.coppermoly.com.au).

*“Major Copper-Gold Systems being Drill Tested.”*

Global Mines - Sydney  
Investor Presentation - July 2011

COPPERMOLY  
Limited

# Disclaimer

This document is not a disclosure document nor does it constitute the provision of financial product advice. No representation or warranty is made as to the accuracy, completeness or reliability of the information.

The information is provided expressly on the basis that recipients will carry out their own independent inquiries into the matters contained herein and make their own independent decisions about the affairs, financial position or prospects of the Company which reserves the right to update, amend or supplement any information at any time in its absolute discretion.

The technical information provided by Barrick (PNG Exploration) Ltd, a wholly owned subsidiary of Barrick Gold Corporation has been interpreted by Coppermoly Ltd and does not necessarily reflect views by Barrick.

## **Competency Statement**

The information in this presentation that relates to Exploration Results is based on information compiled by Peter Swiridiuk, who is a Member of the Australian Institute of Geoscientists.

Peter Swiridiuk is a consultant to Coppermoly Ltd and is employed by Aimex Geophysics. Peter Swiridiuk has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Peter Swiridiuk consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Please consult [www.coppermoly.com.au](http://www.coppermoly.com.au) for more detailed information.

**COPPERMOLY**  
Limited

## Market Cap

- Coppermoly: A\$12m – PNG Copper Porphyry
- Marengo mining: A\$229m – PNG Copper porphyry
- Robust Resources: A\$100m – Indonesia Copper
- Intrepid Mines: A\$350m - Indonesia Copper and Gold
- Exeter Resources: C\$360m – Chile Gold and Copper

# Highlights

- In an agreement with Barrick (PNG Exploration) Ltd, Barrick have spent over half of A\$20M required to attain a 72% interest in three tenements.
- Drilling and Exploration has defined at least two major Copper-Molybdenum-Gold systems currently undergoing additional drilling.
- **Nakru-1:** Drillhole intersection of **213.75m grading 0.92% copper and 0.33 g/t gold.** Drilling testing mineralisation extents currently over 500m x 200mx 200m Depth
- **Simuku:** Inferred Mineral Resource of 200 million tonnes at 0.36% Cu, 61ppm Mo, 0.06g/t Au, 2g/t Ag. Drilling to test higher grade copper zones at depth.
- Projects accessible by road/track to major infrastructure including deep water port, airport and general amenities.
- Coppermoly has an additional two tenements under application and is actively looking for additional projects.

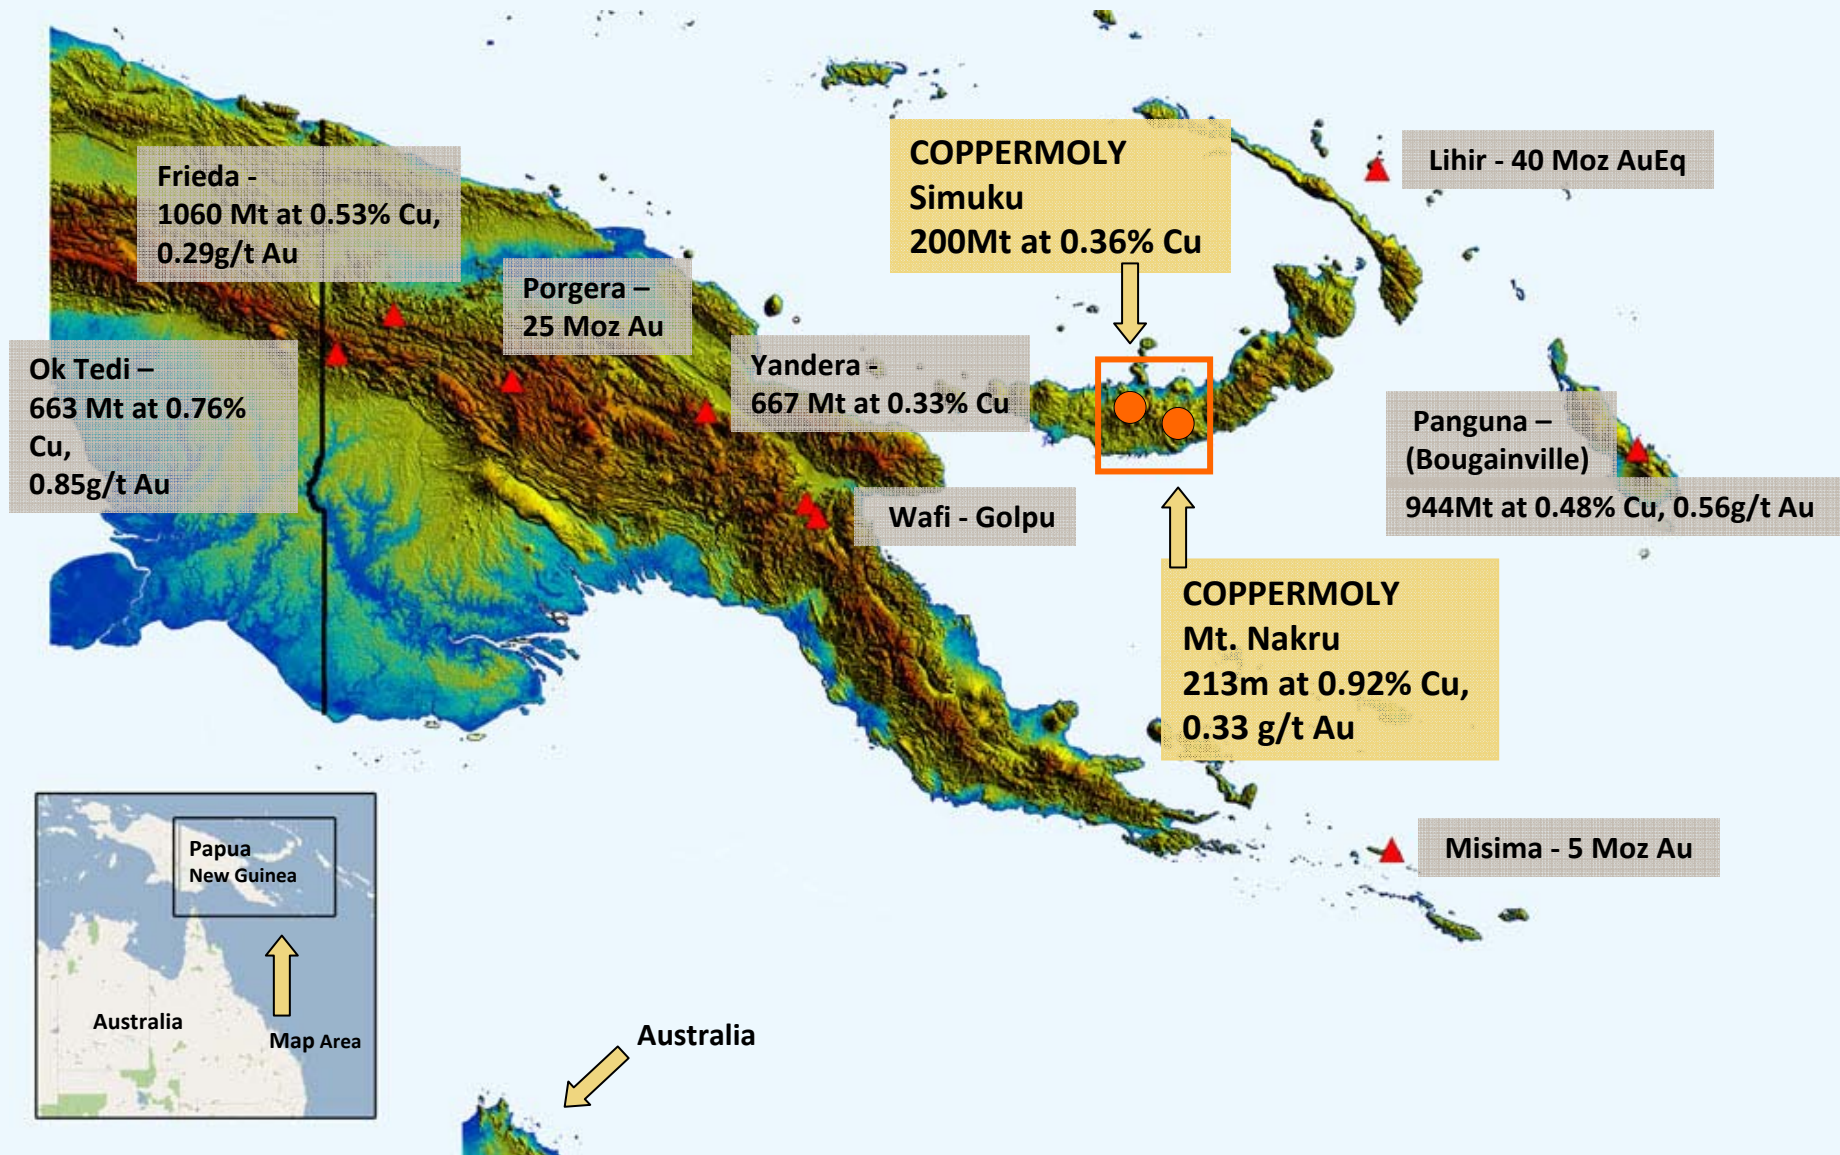

# Company Overview (ASX:COY)

New Guinea Gold Corp.	15%
Vangold Resources Ltd	10%
National Nominees Ltd	5.7%
Barrick	4.5%
Current Shares on Issue	139 million
Total Listed Options (COYOA 7 cents)	23.6 million
Share Price	9 cents
Market Capitalisation	\$12 million
Cash at Bank	\$1.6 M
Top 20 Shareholders currently hold	56%

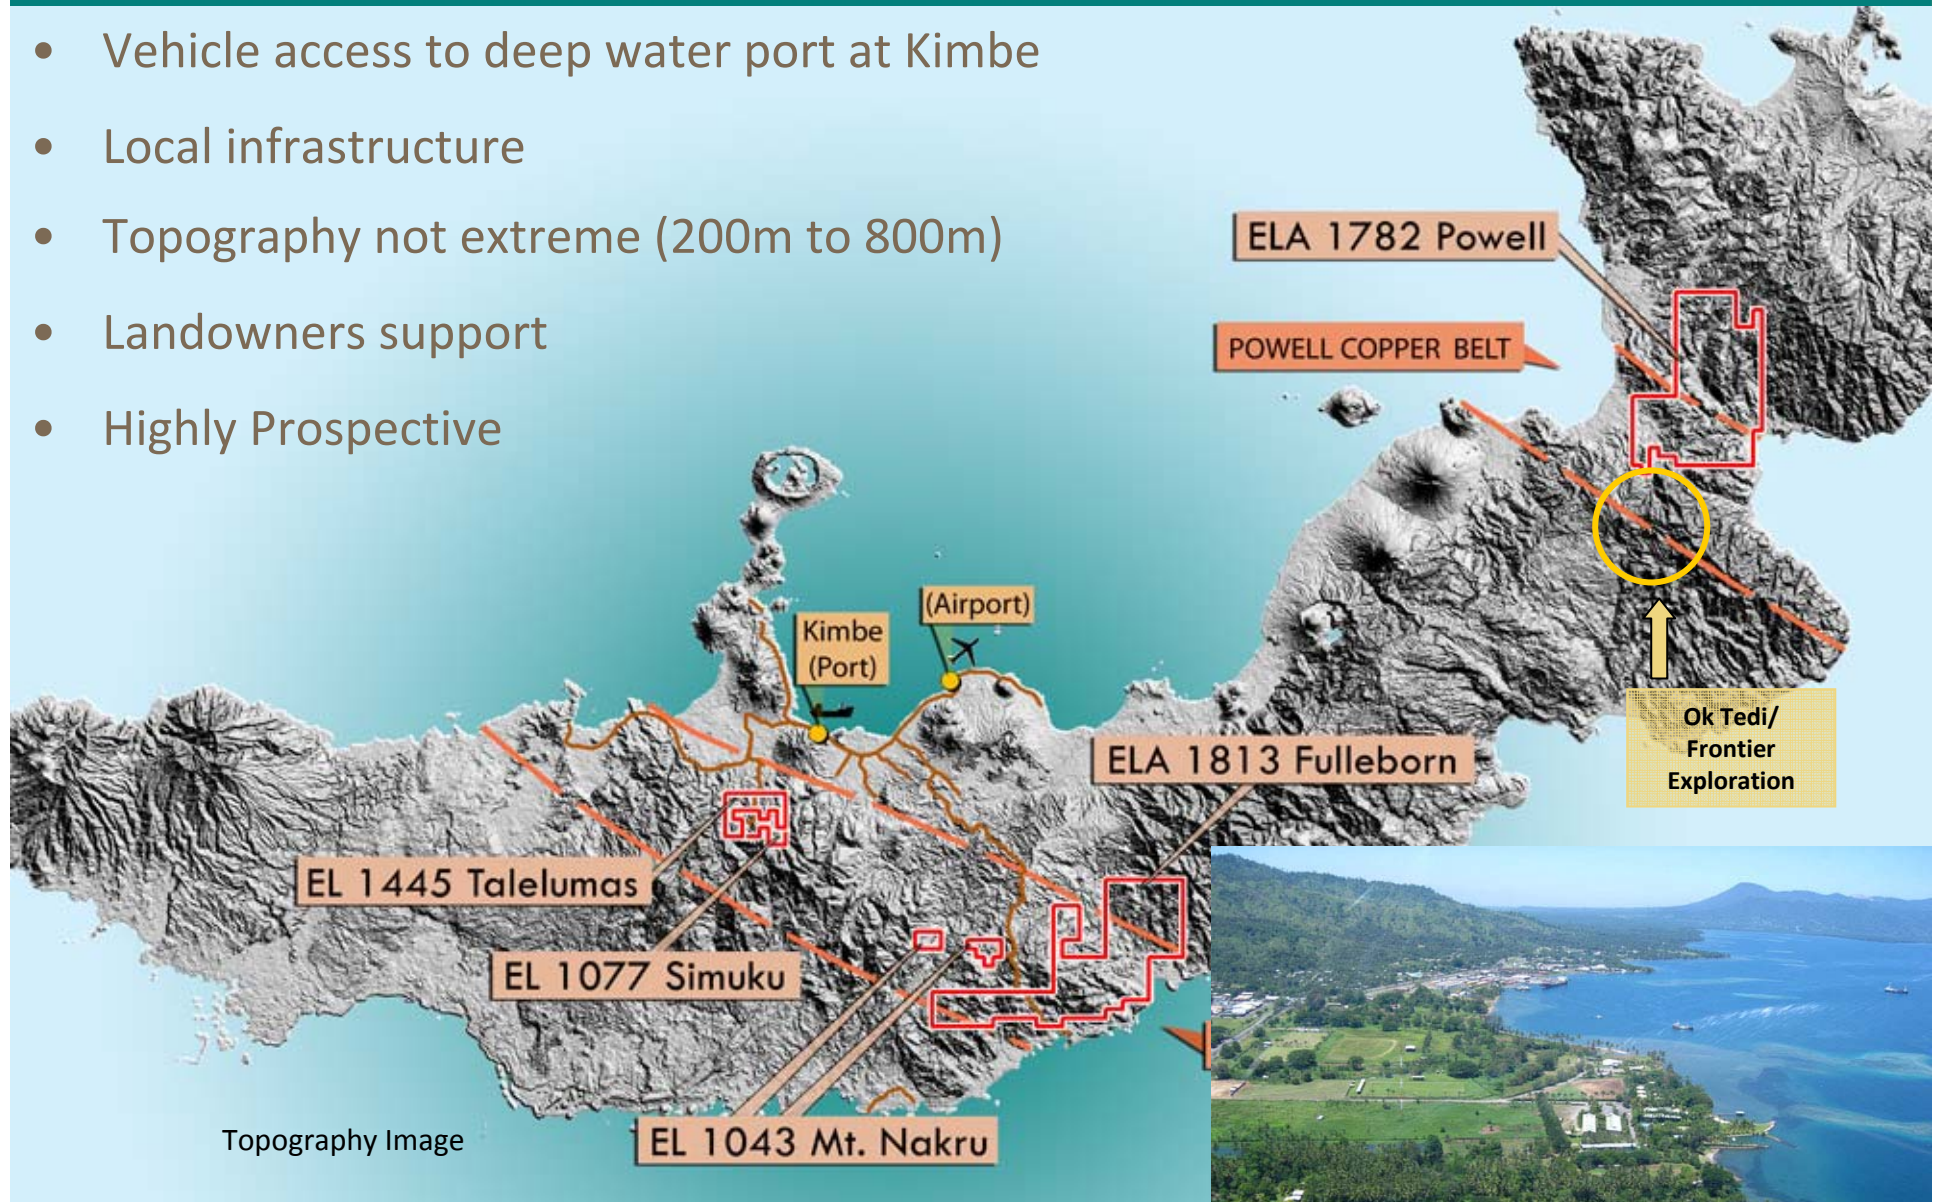

# Mineralised Papua New Guinea

# New Britain Island – Excellent Location

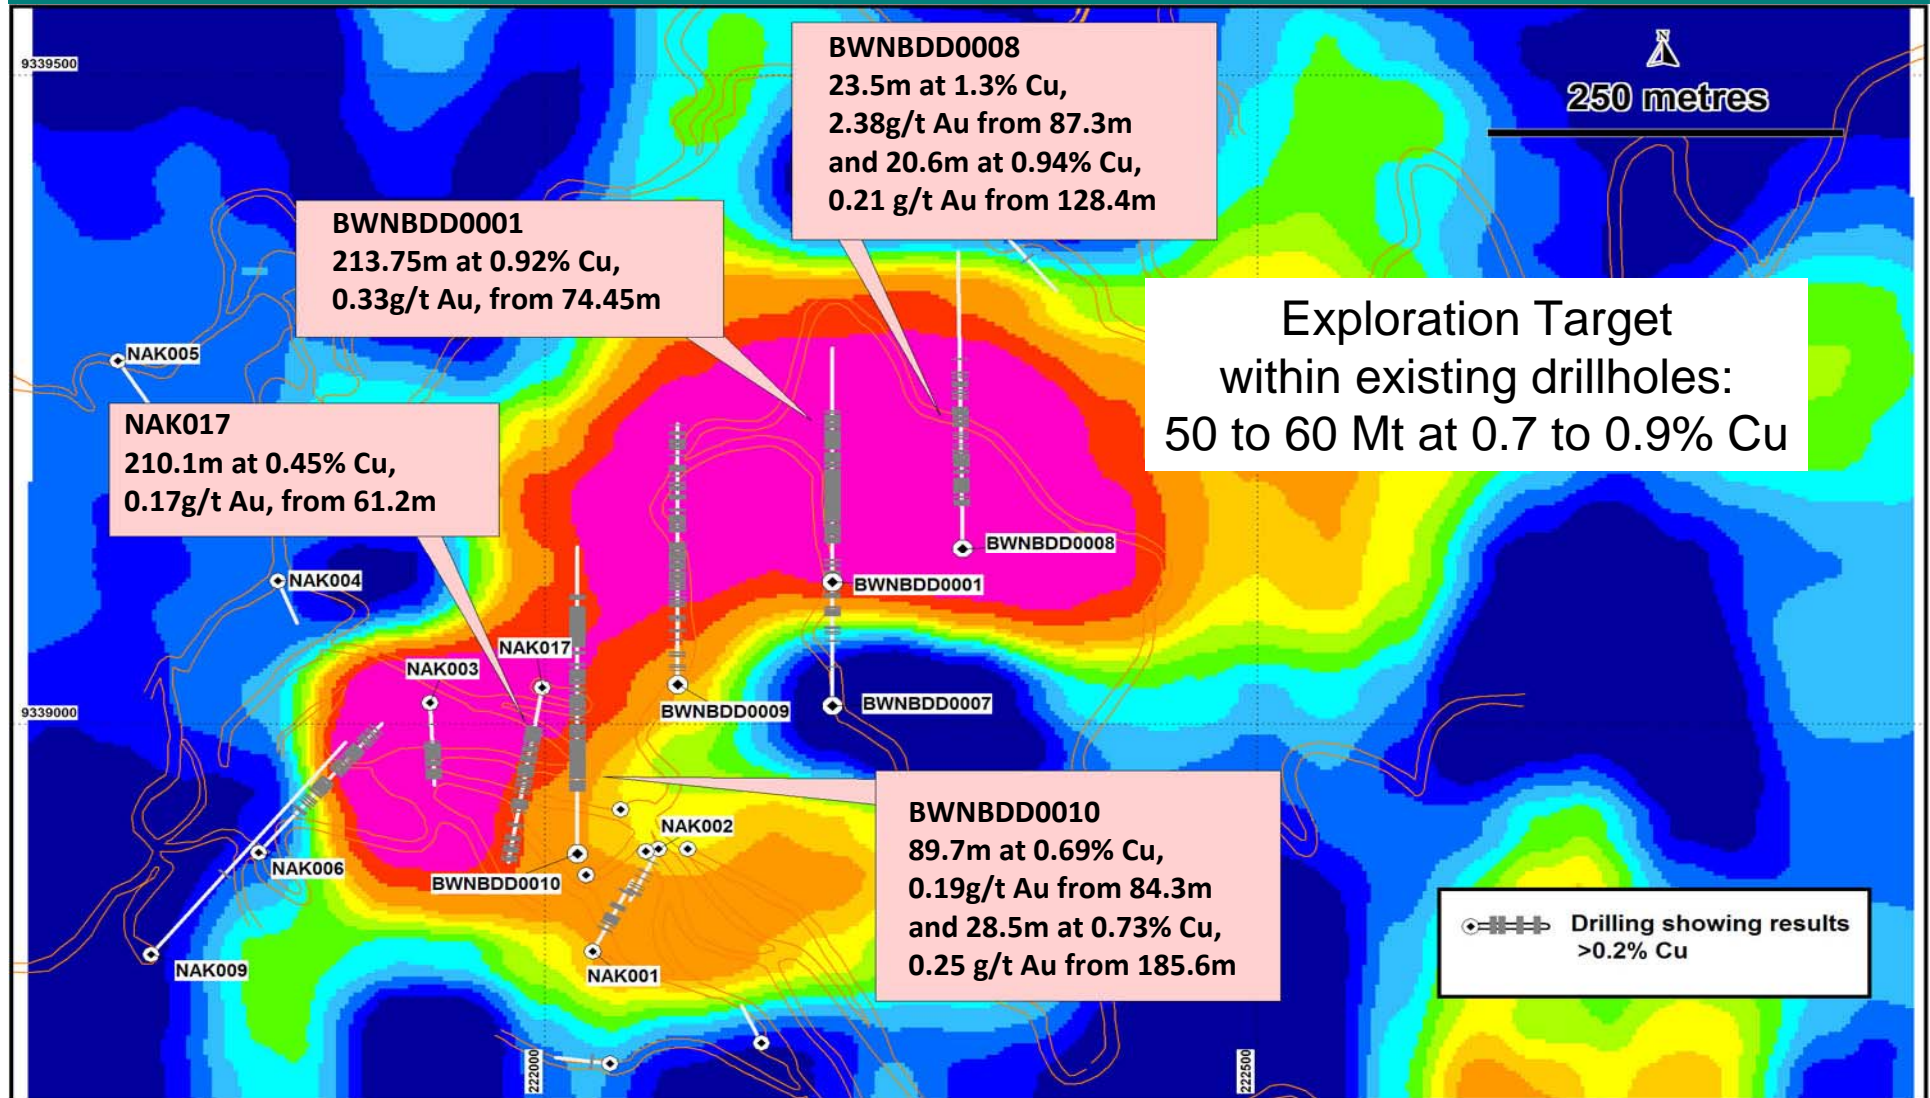

- Vehicle access to deep water port at Kimbe
- Local infrastructure
- Topography not extreme (200m to 800m)
- Landowners support
- Highly Prospective

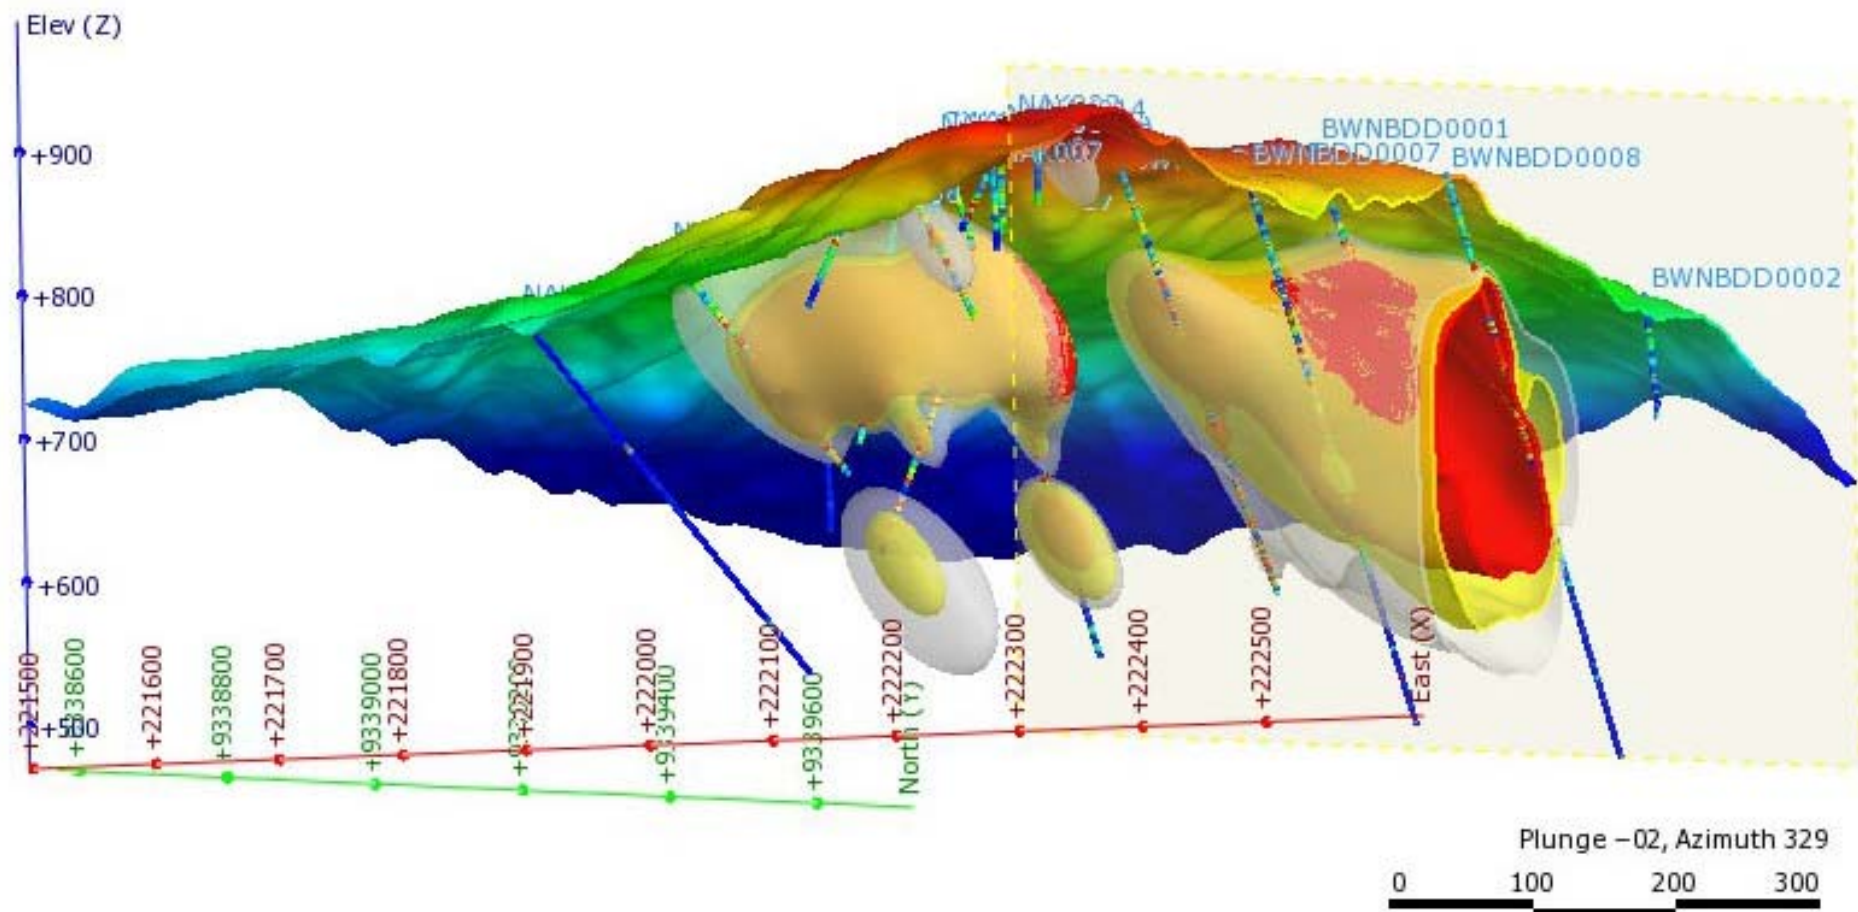

# Nakru 1 – Copper Gold System

## Barrick to drill Test for Tonnage Potential

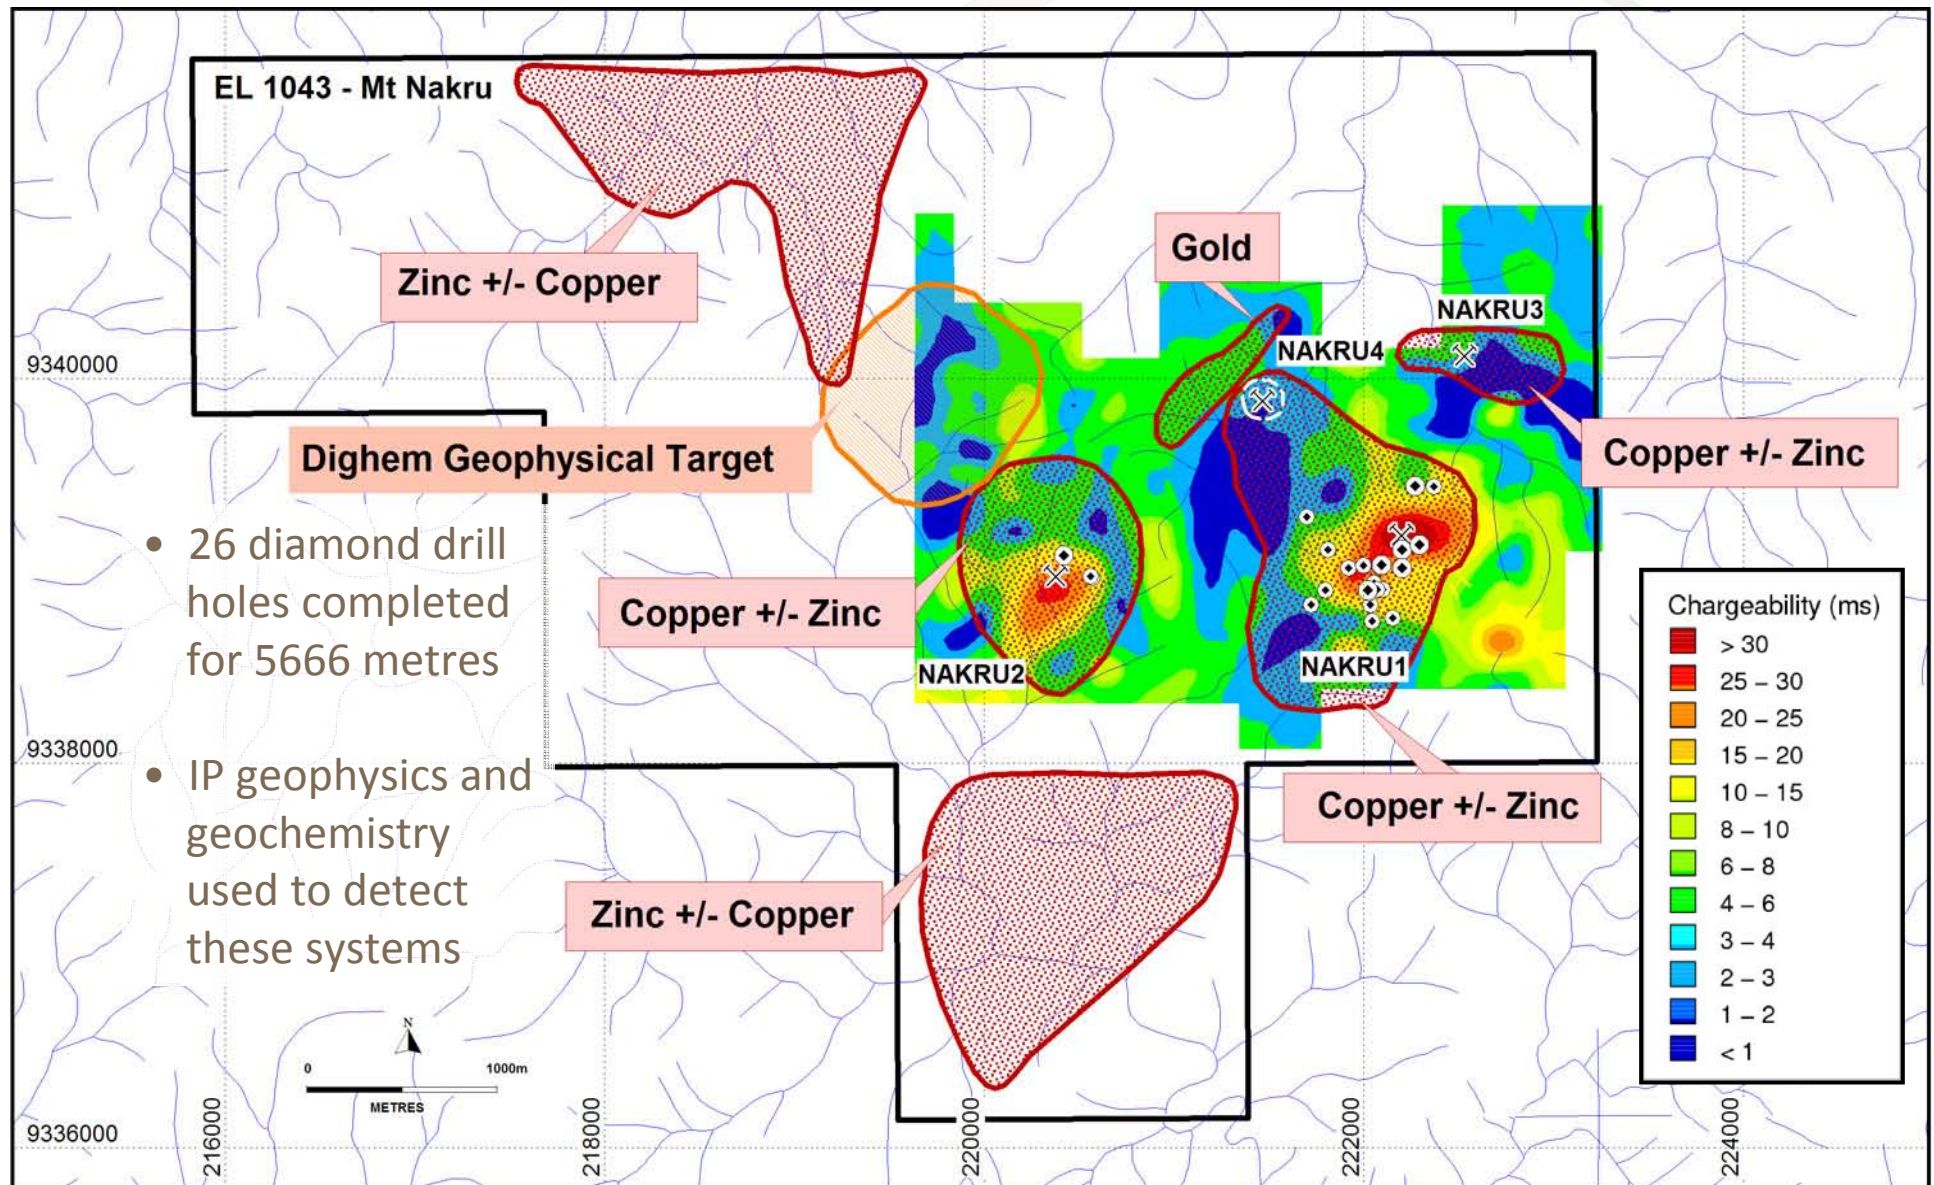

In accordance with Clause 18 of The JORC Code the reference to 'Exploration Target' in terms of target size and type should not be taken as an estimate of Mineral Resources or Ore Reserves. The statement referring to quantity and grade of the exploration target is based upon exploration results to-date including extensive drilling which has intersected the mineralization. The potential quantity and grade is conceptual in nature. There has been insufficient exploration to define a Mineral Resource and it is uncertain if further exploration will result in the definition of a Mineral Resource.

# Nakru 1 – Mineralisation Model

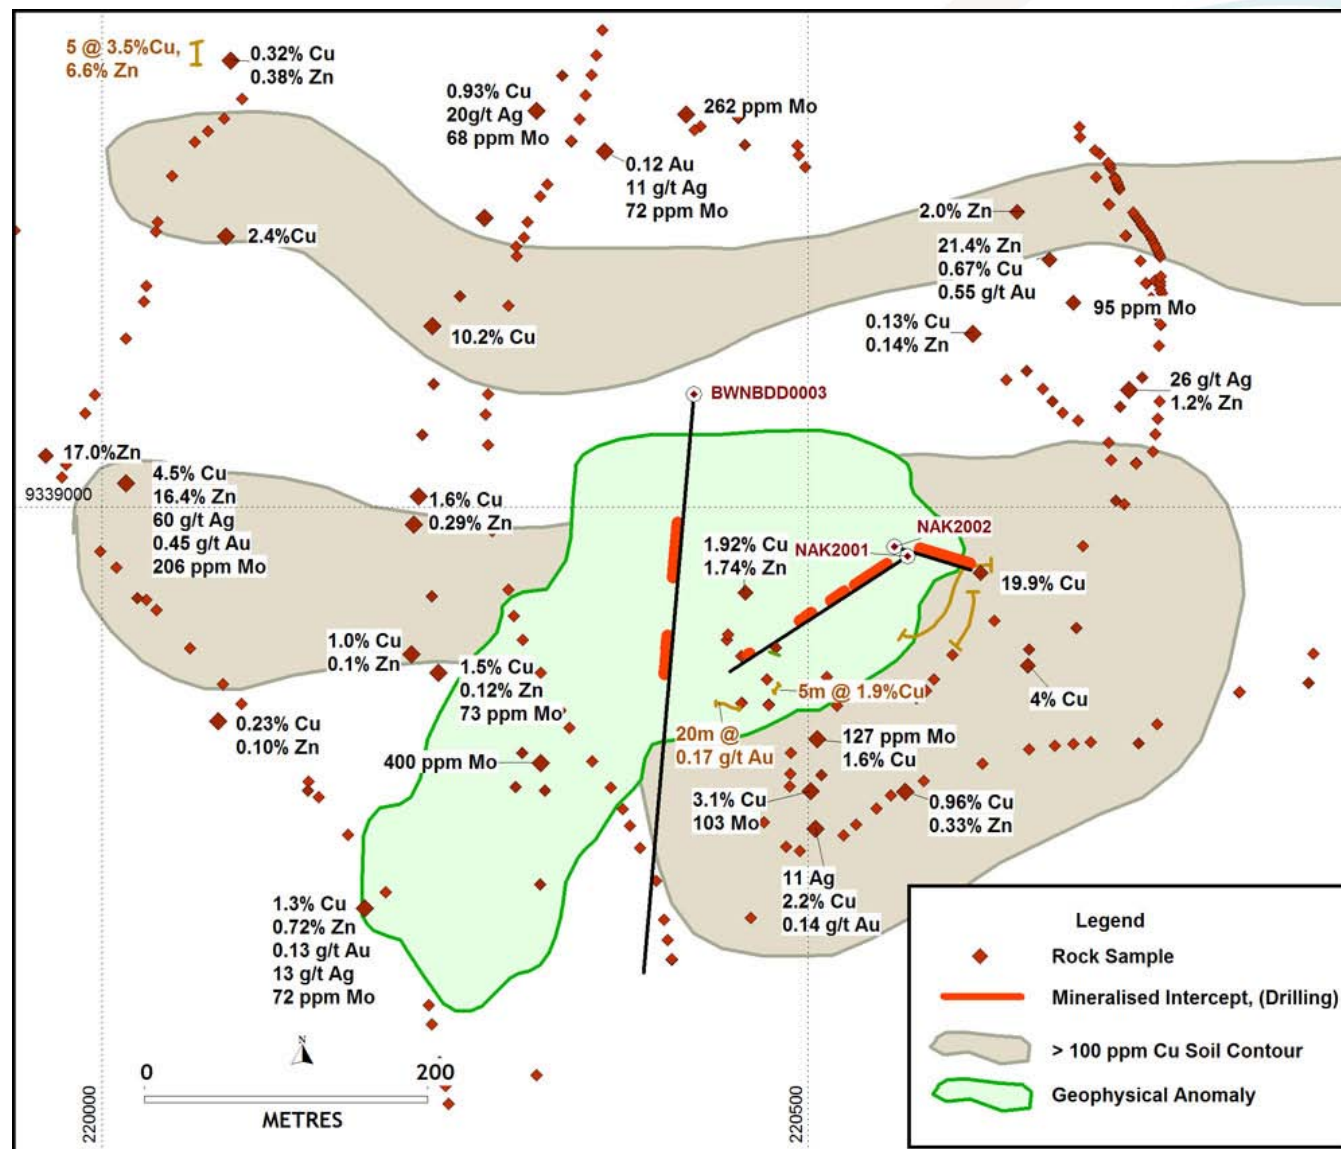

# Nakru Area showing Prospects

# Nakru 2 - Sulphide Copper System

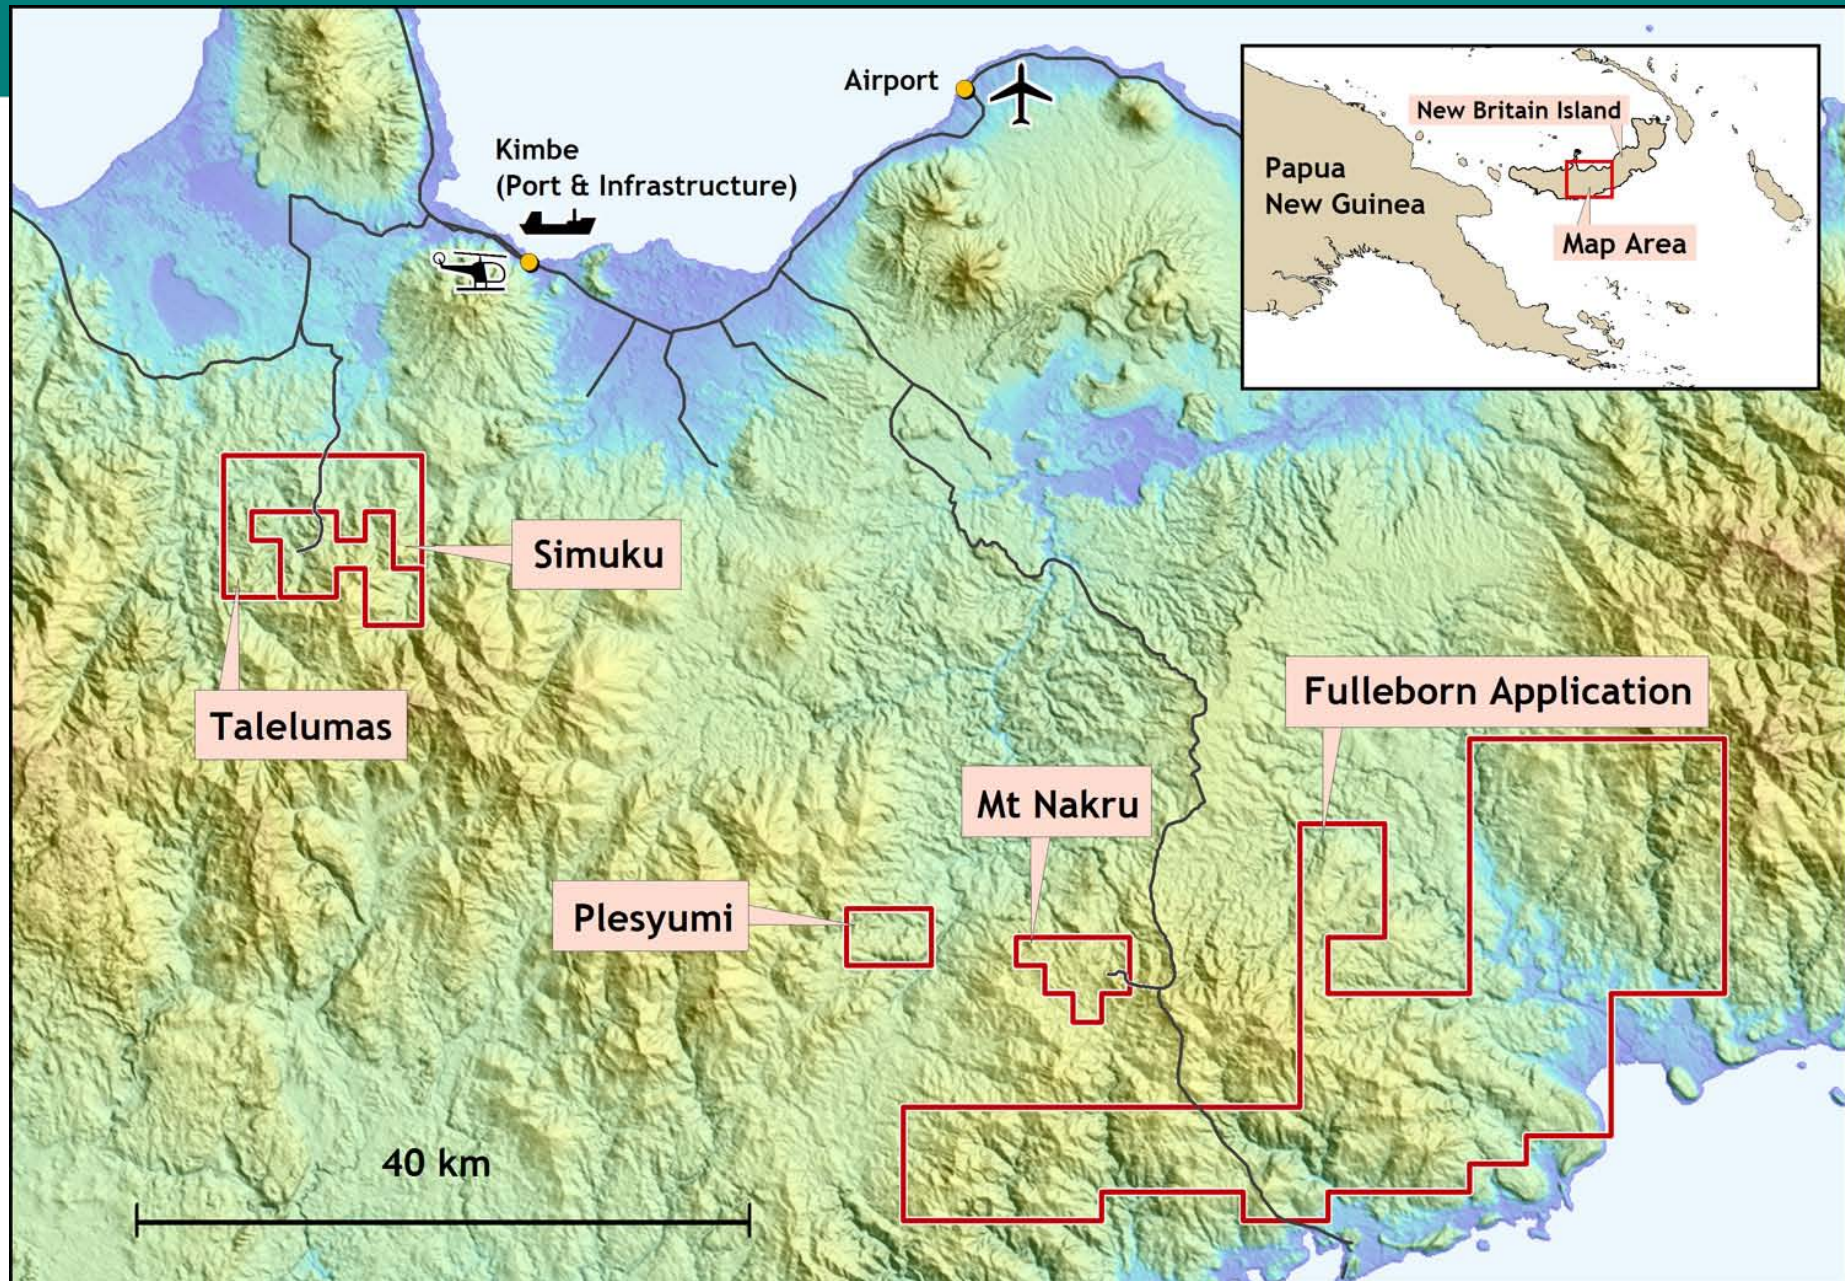

- Breccia hosted copper system with 800m diameter envelope of mineralisation
- Massive Sulphide copper lens: 6.8m at 3.8% Cu at 30m Depth
- Drill tested with one deep hole by Barrick: 64m at 0.59% Cu at 141m depth. 4.9m at 13.6% Zn, 24.03 g/t Ag, 0.41 g/t Au, 0.85% Cu

**COPPERMOLY**  
Limited

# Simuku / Talelumas Project

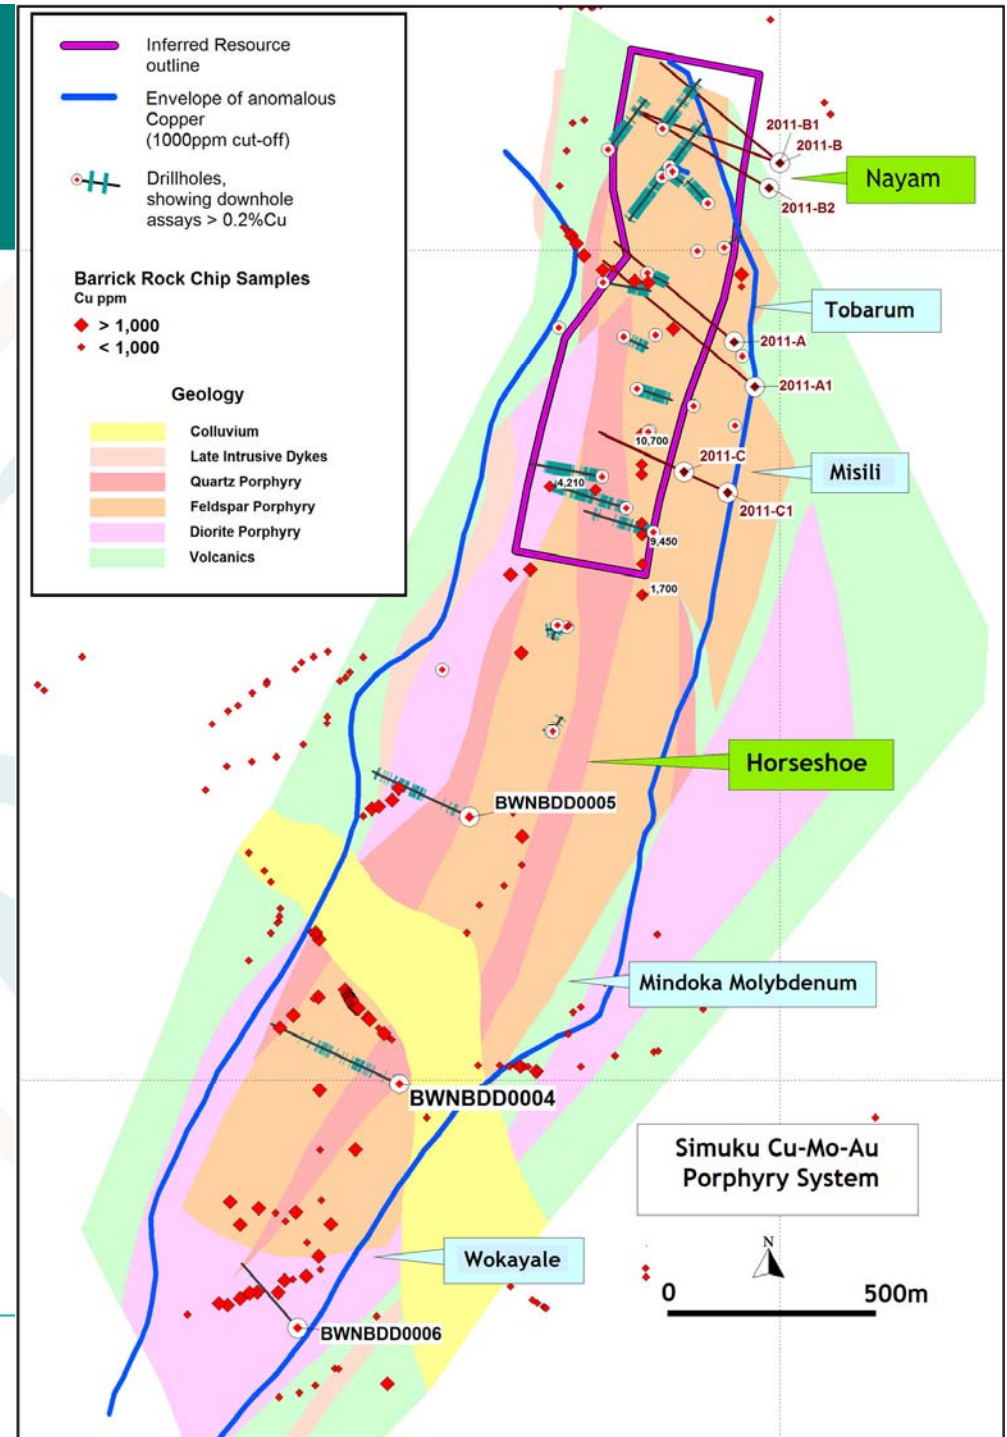

# Simuku Copper System

## Simuku:

1. Maiden Inferred Resource of 200 million tonnes at 0.36% copper, 61 ppm Mo, 0.06 g/t Au, 2 g/t Ag to be tested with 600m deep drillholes in 2011
2. 20km from deep water port
3. Track/road access
4. 300m above sea level

# Drilling To Test Higher Grade Zones at Depth

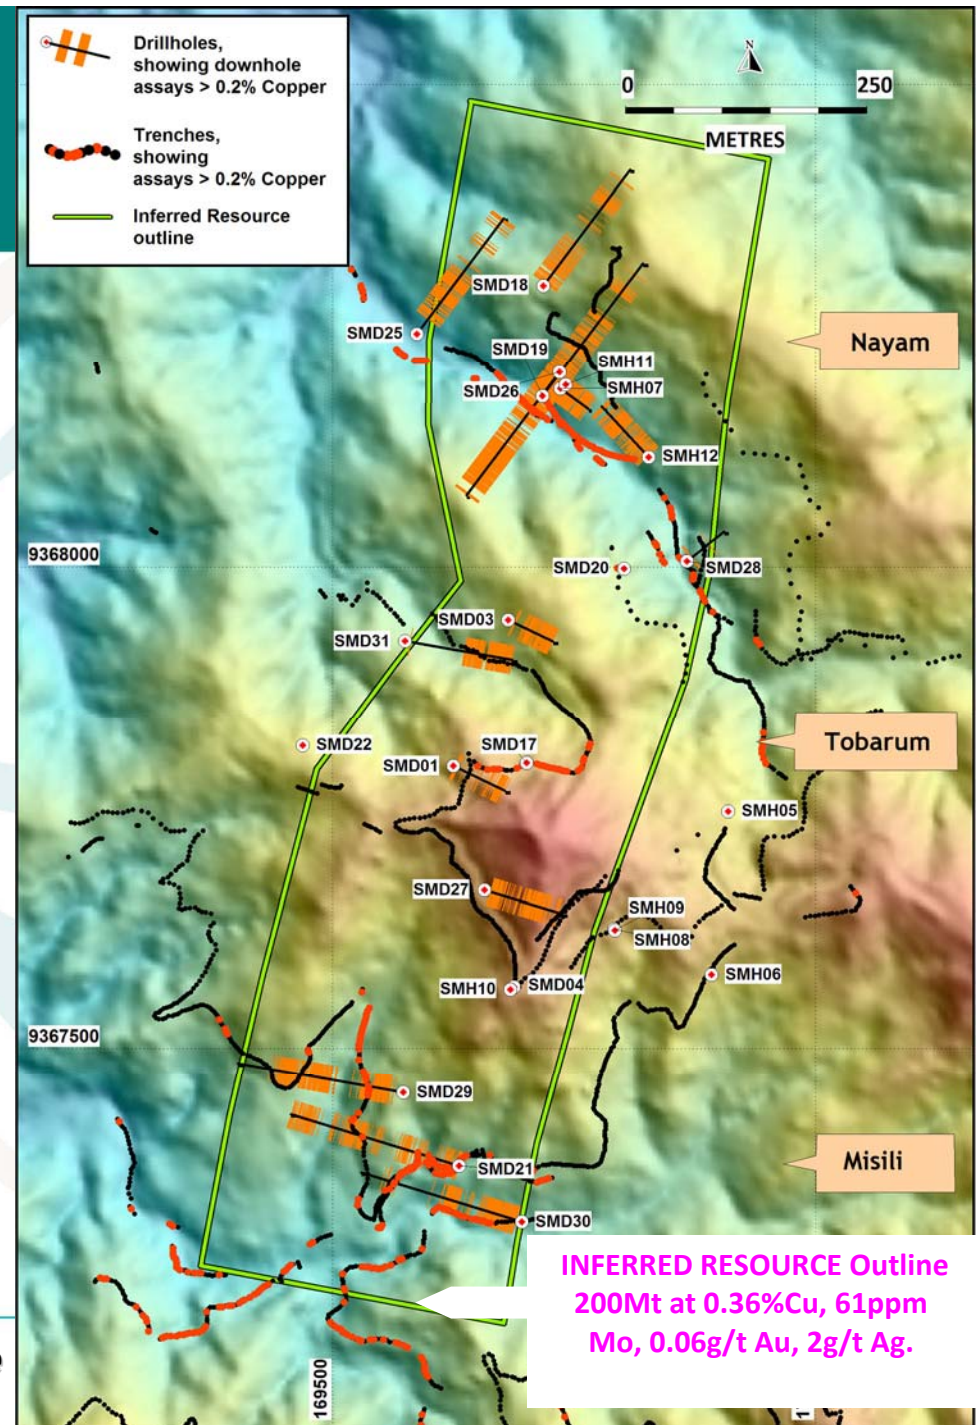

## Nayam Prospect

- SMD26 intersected 282m at 0.45% Copper from 18m depth
- SMD19 intersected 93m at 0.59% Cu from 8m depth Including secondary enrichment of 18m of 1.0% Cu from 18m depth

## Tobarum Prospect

- SMD10 intersected 58m at 0.53% Cu at 24m depth

**Topography Image**

# Simuku and Regional Kulu Copper and Gold Prospects Being explored by Barrick

# Board and Management with PNG Experience

**Dal Brynelsen – *Non Executive Chairman***, CEO of Vangold Resources Ltd (TSX), founding Director of Griffin Mining. Over 30 years experience in the mining industry.

**Peter Swiridiuk – *Managing Director***, 20 years experience copper and gold exploration in South Pacific, South East Asia, Middle East, Mexico, Cyprus and Australia.

**Maurice Gannon – *Executive Director and Company Secretary***, BSc, GAICD, FCIS, AFAIM, MAusIMM, 21 years experience in earth sciences, business and financial management.

**Bob McNeil – *Non Executive Director***, 50 years experience in mining and exploration.

**Ces Iewago – *Non Executive Director***. BACOM, MBA, FAICD, expertise in PNG banking and finance. Chairman of NGG (TSX). Political and Mining connections in PNG.

**On-Site PNG Administration and Base of Operations at Kimbe on New Britain Island.**

**Denis O'Neill – Geological Consultant**, over 36 years experience in mining and exploration.

## Why invest in Coppermoly?

- Further drilling and exploration programme underway throughout 2011 by Barrick.
- Higher grade copper areas within Simuku Inferred Resources area to be drill tested at depth.
- Further drilling at Nakru-1 to test extents of mineralisation. Higher copper grade near surface.
- Significantly sized copper systems accessible by vehicle to existing infrastructure and a deep water port.

# Notes:

- All stated intersections are weighted assay averages ( $[\text{Sum of each total interval} \times \text{grade}] / \text{Total length of intersection}$ ).
- Drill core and rock samples were transported to the field camp site then to the Barrick base in the town of Kimbe. The drill core was logged, orientated and sampled between 1m and 2m intervals from core split by saw. Half core was then freighted to Intertek Services in Lae (PNG) for sample preparation. Sample preparation involved drying the samples to 105 degrees C, crushing in a jaw crusher to 95% of the sample passing < 2 mm, rifle splitting and pulverising to 95% passing < 75 microns. Analytic pulps were then shipped to Intertek Laboratory Services in Jakarta (Indonesia) for geochemical analysis. Gold was analysed by 50g Fire Assay with Atomic Absorption Spectroscopy finish (gravimetric finish for samples with gold > 5 g/t). Multi-element analysis was done by multi acid digestion (HCL, HNO<sub>3</sub>, HClO<sub>4</sub>/HF) ICP. Copper values greater than 0.5% were re-assayed with AAS finish. Intertek laboratories have an ISO 17025 accreditation.
- BWNBDD Series Drill Core is PQ, HQ and NQ in size with core recovery predominantly >95%.
- Drillhole co-ordinates are given in UTM Zone 56, AGD66 Datum.
- Mineralised intersections are quoted as downhole widths.
